

The
William J. Larsen
Distinguished Lecture

Thursday, February 13, 2014
12:00 - 1:00pm
Rieveschl Auditorium
Vontz Center

**“Wnt Signaling and
Stem Cell Control”**

Roel Nusse, Ph.D.

Virginia & Daniel K. Ludwig Professor of Cancer Research
Professor of Developmental Biology
Howard Hughes Medical Institute Investigator
Institute for Stem Cell Biology and Regenerative Medicine
Stanford University School of Medicine

Dr. Roel Nusse who discovered the Wnt1 gene, is an elected member of the National Academy of Sciences and a fellow of the American Academy of Arts and Sciences. Dr. Nusse's current research interests include exploring the function of Wnt signaling molecules during stem cell proliferation and differentiation.

Sponsored by UC College of Medicine
Department of Cancer Biology
