FOR MEN AND WOMEN

Diagnostic X-rays, fluoroscopic examinations (for example: GI series, barium enema) and scans result in minor radiation exposure. It is important that we ask you about these tests each year. Write in the number of examinations. During an examination more than one "picture" or view may be taken. Count all the views taken on one day as one examination. Do not include dental X-rays or Panorex X-rays of teeth in the questions below. Do not include MRI's (magnetic resonance imaging) or CAT scans.

	How many chest X-rays have you had in the last year? Write in "O" if you have ha					
	Chest X-rays					
	How many X-rays or fluoroscopic examinations (for example: GI series, or barium enemana have you had during the last year? Write "O" if you have had none.					
	Stomach					
	Intestine					
	Back					
	Arms/Legs					
	Head/Neck					
	Breast (Mammogram)					
Hov	How many scans have you ever had in the last year? Write "0" if you have had none.					
	Bone					
	Thyroid					
	Heart					
	Lung					
	Kidney					
	Brain					
	Other:					
	During the past year, have you been treated with radium, radiation therapy, or cadioactive isotopes for a medical condition? Some examples: radioactive isotope for hyroid disease; radium implant for cervical cancer; radiation therapy for any type or cancer, including skin cancer; X-ray therapy for acne or fungal infections of the scale or other areas.					
	IF YES, for what disease?					
	what part of your body?
